

Trusted Decking Solutions for U.S. Navy & Industrial Assets

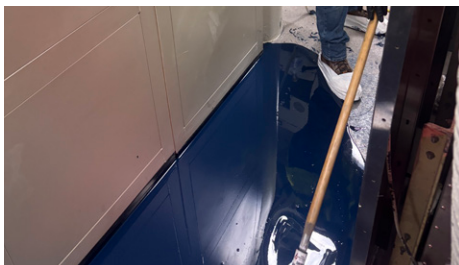

IMIA delivers industry-leading solutions customized to the complex demands of critical assets through advanced preservation techniques, structural repairs, radiological remediation, and specialized decking systems. Our skilled teams combine precision, safety, and quality in every project, delivering durable, functional surfaces for interior spaces designed for long-term performance. IMIA's integrated approach delivers comprehensive, end-to-end support that keeps operations moving and assets protected.

From high-traffic areas to finished interior spaces, IMIA provides decking solutions that provide durability, safety, and functionality. Our teams install and support a range of interior surface systems designed to meet demanding specifications, perform under daily operational use, and support the long-term reliability of U.S. Navy and industrial assets.

IMIA supports each decking project with careful surface preparation and controlled application practices. From removing worn materials to preparing the substrate for proper adhesion, our teams focus on consistency, durability, and quality execution before the final system is installed.

IMIA provides a range of interior decking systems and surface solutions to meet the demands of shipboard and industrial spaces, including:

Polymeric Resin Coating (PRC) System

Designed for durable, high-performance deck surface protection.

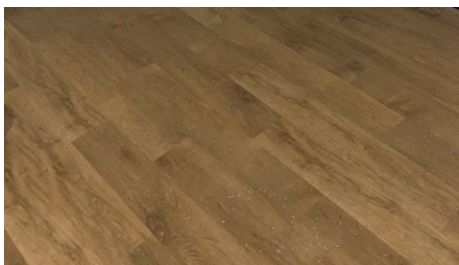

Quartz Decking

A durable resin-based decking system broadcast with quartz aggregate to create a textured, slip-resistant surface.

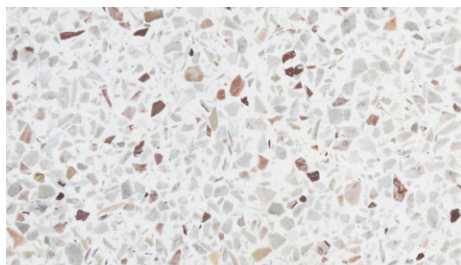

Electrical Grade Matting

Durable, non-conductive surface protection used in electrical work zones to support safety, traction, and performance.

Vinyl Wood Flooring

Durable, low-maintenance flooring with a wood-look finish, offering lasting performance and a professional appearance.

Terrazzo

Durable, polished surface system providing long-term performance, easy maintenance, and a finished appearance.

Tile

Durable surface system offering lasting performance, easy maintenance, and a clean, finished look.

From preparation to installation, IMIA delivers interior decking solutions designed to ensure safety, durability, and long-term performance in demanding marine and industrial environments.
